

## BIG IDEAS

Design for the life cycle includes consideration of social and **environmental impacts**.

Personal design interests require the evaluation and refinement of skills.

Tools and technologies can be adapted for specific purposes.

## Learning Standards

Curricular Competencies	Content
<p><i>Students are expected to be able to do the following:</i></p> <p><b>Applied Design</b></p> <p><i>Understanding context</i></p> <ul style="list-style-type: none"><li>Engage in a period of <b>user-centred research</b> and <b>empathetic observation</b> to understand design opportunities</li></ul> <p><i>Defining</i></p> <ul style="list-style-type: none"><li>Establish a point of view for a chosen design opportunity</li><li>Identify potential users, intended impact, and possible unintended negative consequences</li><li>Make decisions about premises and <b>constraints</b> that define the design space, and develop criteria for success</li><li>Determine whether activity is collaborative or self-directed</li></ul> <p><i>Ideating</i></p> <ul style="list-style-type: none"><li>Critically analyze how competing social, ethical, and sustainability considerations impact design</li><li>Generate ideas and add to others' ideas to create possibilities, and prioritize them for prototyping</li><li>Evaluate suitability of possibilities according to success criteria and constraints</li><li>Work with users throughout the design process</li></ul> <p><i>Prototyping</i></p> <ul style="list-style-type: none"><li>Identify, critique, and use a variety of <b>sources of inspiration</b></li><li>Choose an appropriate form, scale, and level of detail for prototyping, and plan procedures</li><li>Analyze the design for the life cycle and evaluate its <b>impacts</b></li></ul>	<p><i>Students are expected to know the following:</i></p> <ul style="list-style-type: none"><li>specialized techniques and design related to furniture and cabinetry construction</li><li><b>components</b> specific to cabinet construction</li><li>incorporation of <b>non-wood materials</b></li><li><b>hardware</b> selection for specific purposes</li><li><b>standard sizing</b> for specific applications</li><li>preparation of a working drawing complete with a set of procedures and steps</li><li>use of a cutting list to minimize waste</li><li><b>wood material</b> selection</li><li><b>machine set-ups</b></li><li>types, purposes, and application of <b>finishes</b></li><li>preparation of materials for machining, assembly, and finishing</li><li>traditional <b>decorative techniques</b></li><li><b>reclamation</b> of used materials</li></ul>

## Learning Standards (continued)

Curricular Competencies	Content
<ul style="list-style-type: none"><li>• Visualize and construct prototypes, making changes to tools, materials, and procedures as needed</li><li>• Record <b>iterations</b> of prototyping</li></ul> <p><b>Testing</b></p> <ul style="list-style-type: none"><li>• Identify and communicate with <b>sources of feedback</b></li><li>• Develop an appropriate test of the prototype, conduct the test, and collect and compile data</li><li>• Evaluate design according to critiques, testing results, and success criteria to make changes</li></ul> <p><b>Making</b></p> <ul style="list-style-type: none"><li>• Identify appropriate tools, technologies, materials, processes, cost implications, and time needed</li><li>• Create design, incorporating feedback from self, others, and testing prototypes</li><li>• Use materials in ways that minimize waste</li></ul> <p><b>Sharing</b></p> <ul style="list-style-type: none"><li>• Decide how and with whom to <b>share</b> or promote design, creativity, and processes</li><li>• Share the product with users and critically evaluate its success</li><li>• Critically reflect on their design thinking and processes, and identify new design goals</li><li>• Identify and analyze new design possibilities, including how they or others might build on their concept</li></ul> <p><b>Applied Skills</b></p> <ul style="list-style-type: none"><li>• Apply safety procedures for themselves, co-workers, and users in both physical and digital environments</li><li>• Identify and assess skills needed for design interests, and develop specific plans to learn or refine them over time</li><li>• Demonstrate competency and proficiency in skills at various levels involving manual dexterity and furniture and cabinetry construction techniques</li></ul> <p><b>Applied Technologies</b></p> <ul style="list-style-type: none"><li>• Explore existing, new, and emerging tools, <b>technologies</b>, and systems to evaluate suitability for their design interests</li><li>• Evaluate impacts, including unintended negative consequences, of choices made about technology use</li><li>• Examine and analyze the role that changing technologies play in furniture and carpentry construction</li></ul>	<ul style="list-style-type: none"><li>• <b>design for the life cycle</b></li><li>• ethics of <b>cultural appropriation</b> in design process</li><li>• future career options and opportunities in furniture and cabinetry construction</li><li>• <b>interpersonal and consultation skills</b> to interact with clients</li></ul>
