

Context

In B.C.'s redesigned curriculum, Indigenous knowledge and perspectives are integrated throughout all areas of learning and are evident in the curriculum's rationale statements, goals, big ideas, mandated learning standards, and elaborations. The First Peoples Principles of Learning offer a crucial lens for curriculum, placing a significant importance on the authentic integration of Indigenous knowledge and perspectives in relevant and meaningful ways.

The intent behind this integration is to promote a growing understanding of Indigenous peoples in B.C. that will contribute to the development of educated citizens who reflect on and support reconciliation. This approach to Indigenous education encourages enlightened discussion among teachers and students in all areas of learning and grade levels, and this approach values and prioritizes Indigenous knowledge and perspectives that can only be found in B.C.

Purpose

The *Indigenous Knowledge and Perspectives: Cross-Curricular References in Grade 6* resource is intended to support teachers in authentically integrating Indigenous knowledge and perspectives into their classrooms. This resource provides a cross-curricular overview of the explicit and implicit references to Indigenous knowledge and perspectives in the Big Ideas, Curricular Competencies, and Content across all subject areas in the Grade 6 curriculum.

Explicit References

Explicit references include the Big Ideas, Curricular Competencies, and Content that directly refer to Indigenous knowledge and perspectives. For example, the Grade 6 Arts Education curriculum includes the following explicit reference:

Arts Education, Content, **traditional and contemporary Aboriginal arts and arts-making processes**

⇒ *dances, songs, stories, and objects created by Aboriginal peoples for use in daily life or to serve a purpose inspired by ceremonies or rituals as part of cultural tradition*

Implicit References

Implicit references are Big Ideas, Curricular Competencies, and Content that indirectly refer to Indigenous knowledge and perspectives. For example, the Grade 6 Applied Design, Skills, and Technologies curriculum includes the following implicit reference:

Applied Design, Skills, and Technologies, Curricular Competency, **Evaluate their product against their criteria and explain how it contributes to the individual, family, community, and/or environment.**

The implicit references included in this resource represent just one perspective and should not be considered the only interpretation. Identifying implicit references depends on personal and cultural background, prior knowledge and experience, subject-matter expertise, points of view, and connections to place*. As such, the implicit references in this resource serve only as a guide and should not be viewed as a conclusive list.

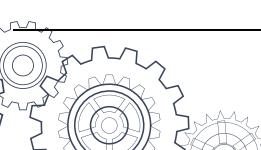

Note on Elaborations: Explicit references to Indigenous knowledge and perspectives that are found within the Elaborations of Big Ideas, Curricular Competencies, or Content are considered *implicit* unless they are accompanied by an explicit reference in the Big Ideas, Curricular Competencies, or Content.

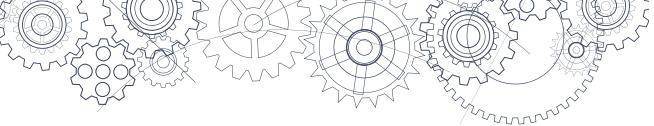

The key below shows how the information in the chart is structured:

Bolted print	Mandated Learning Standard
•	Sub-points of a Learning Standard
⇒	<i>Elaborations</i>
○	<i>Key questions or samples</i>

***Place** refers to any environment, locality, or context with which people interact to learn, create memory, reflect on history, connect with culture, and establish identity.

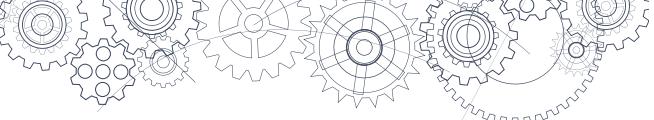

Indigenous Knowledge and Perspectives: Cross-Curricular References K–9

		ADST	Arts	Career Ed.	ELA	Français langue première	Français langue seconde – immersion	Languages	Mathematics	PHE	Science	Social Studies
Big Ideas	Explicit					Aboriginal peoples narratives are part of Canada's Francophone history and culture.						
	Implicit	Evaluate personal, social, and environmental impacts and ethical considerations. Evaluate their product against their criteria and explain how it contributes to the individual, family, community, and/or environment. Identify the personal, social, and environmental impacts, including unintended negative consequences, of the choices they make about technology use. Identify how the land, natural resources, and culture influence the development and use of tools and technologies.	Engaging in creative expression and experiences expands people's sense of identity and community. Dance, drama, music, and visual arts are each unique languages for creating and communicating. Experiencing art is a means to develop empathy for others' perspectives and experiences.	Our attitudes toward careers are influenced by our view of ourselves as well as by our friends, family, and community.	Exploring stories and other texts helps us understand ourselves and make connections to others and to the world. story/stories: ⇒ narrative texts, whether real or imagined, that teach us about human nature, motivation, and experience, and often reflect a personal journey or strengthen a sense of identity. They may also be considered the embodiment of collective wisdom. Stories can be oral, written, or visual, and used to instruct, inspire, and entertain listeners and readers. Text/texts: ⇒ Text and texts are generic terms referring to all forms of oral, written, visual, and digital communication: -oral texts include speeches, poems, plays, and oral stories, - written texts include novels, articles, and short stories, - visual texts include posters, photographs, and other images, - digital texts include electronic forms of all of the above, - oral, written, and visual elements can be combined (e.g., in dramatic presentations, graphic novels, films, web pages, advertisements). Exploring and sharing multiple perspectives extends our thinking. Extends our thinking: ⇒ questioning and speculating, acquiring new ideas, analyzing and evaluating ideas, developing explanations, considering alternative points of view, summarizing, synthesizing, problem solving Questioning what we hear, read, and view contributes to our ability to be educated citizens.	Texts enable students to consolidate or transform their perceptions. ⇒ texts: a text is a coherent set of written, oral or visual elements that convey meaning and serve to communicate or transmit a message. Texts have numerous representations and can be in the form of Aboriginal narratives, articles, advertising, novels, picture story books, legends, comic books, biographies, correspondence, invitations, instructions, diagrams, charts, news stories, films, songs, poems, nursery rhymes, photographs, totem poles, images, works of art, oral presentations, blogs, surveys, reports, text messages, videos, television programs, etc.	Discovering other cultures encourages us to examine our own mores and values. 6T: Discovering a new culture requires identifying the ways in which it resembles our own culture.	ASL, Core French, German, Italian, Japanese, Korean, Mandarin, Punjabi, Spanish: Stories help us to acquire language and understand the world around us. ⇒ Stories are a narrative form of text that can be written or visual. Stories are derived from truth or fiction and may be used to seek and impart knowledge, entertain, share history, and strengthen a sense of identity. ⇒ understand the world: by exploring, for example, thoughts, feelings, knowledge, culture, and identity Core French: Learning about Francophone communities helps us develop cultural awareness. German, Japanese, Korean, Mandarin, Punjabi, Spanish: Learning about language from diverse communities helps us develop cultural awareness.	We experience many changes in our lives that influence how we see ourselves and others. Learning about similarities and differences in individuals and groups influences community health.
