

## BIG IDEAS

**Diagrams** are fundamental to investigating, communicating, and discovering properties and relations in geometry.

Finding **invariance amidst variation** drives geometric investigation.

Geometry involves creating, testing, and refining **definitions**.

The **proving process** begins with conjecturing, looking for counter-examples, and refining the conjecture, and the process may end with a written proof.

**Geometry** stories and applications vary across cultures and time.

## Learning Standards

| Curricular Competencies  | Content   |
|--|---|
| <p><i>Students are expected to do the following:</i></p> <p><b>Reasoning and modelling</b></p> <ul style="list-style-type: none"><li>Develop <b>thinking strategies</b> to solve puzzles and play games</li><li>Engage in <b>spatial reasoning</b> in a dynamic environment</li><li>Explore, <b>analyze</b>, and apply mathematical ideas using <b>reason</b>, <b>technology</b>, and <b>other tools</b></li><li><b>Estimate reasonably</b> and demonstrate <b>fluent</b>, <b>flexible</b>, and <b>strategic thinking</b> about number</li><li><b>Model</b> with mathematics in <b>situational contexts</b></li><li><b>Think creatively</b> and with <b>curiosity and wonder</b> when exploring problems</li></ul> <p><b>Understanding and solving</b></p> <ul style="list-style-type: none"><li>Develop, demonstrate, and apply conceptual understanding of mathematical ideas through play, story, <b>inquiry</b>, and problem solving</li><li><b>Visualize</b> to explore and illustrate geometric concepts and relationships</li><li>Apply <b>flexible and strategic approaches</b> to <b>solve problems</b></li><li>Solve problems with <b>persistence and a positive disposition</b></li><li>Engage in problem-solving experiences <b>connected</b> with place, story, cultural practices, and perspectives relevant to local First Peoples communities, the local community, and other cultures</li></ul> | <p><i>Students are expected to know the following:</i></p> <ul style="list-style-type: none"><li>geometric <b>constructions</b></li><li><b>parallel and perpendicular</b> lines:<ul style="list-style-type: none"><li><b>circles as tools</b> in constructions</li><li>perpendicular bisector</li></ul></li><li><b>circle geometry</b></li><li><b>constructing tangents</b></li><li>transformations of 2D shapes:<ul style="list-style-type: none"><li><b>isometries</b></li><li><b>non-isometric transformations</b></li></ul></li><li><b>non-Euclidean geometries</b></li></ul> |

## Learning Standards (continued)

| Curricular Competencies  | Content |
|--|---------|
| <p><b>Communicating and representing</b></p> <ul style="list-style-type: none"><li>• Explain, justify, and evaluate geometric ideas and <b>decisions</b> in many ways</li><li>• Represent mathematical ideas in concrete, pictorial, and symbolic forms</li><li>• Use geometric vocabulary and language to contribute to <b>discussions</b> in the classroom</li><li>• Take risks when offering ideas in classroom <b>discourse</b></li></ul> <p><b>Connecting and reflecting</b></p> <ul style="list-style-type: none"><li>• Reflect on geometric thinking</li><li>• Connect mathematical concepts with each other, other areas, and personal interests</li><li>• Use mistakes as opportunities to advance learning</li><li>• Incorporate First Peoples worldviews, perspectives, <b>knowledge</b>, and <b>practices</b> to make connections with mathematical concepts</li></ul> |         |
