The next step

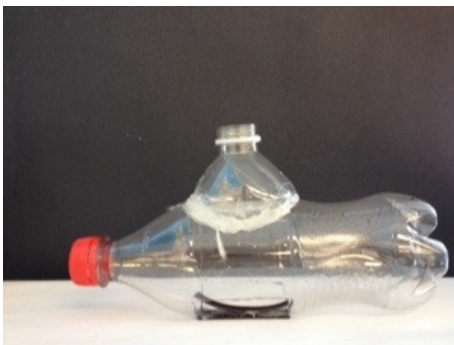

So now I am ready to install the air bladder that will help my submarine re surface. I'm not sure if this will work, but remember that trial and error is the spirit of science exploration.

More construction

So now I've added the "crew cabin" and my Lego submariner is safely locked inside.

Building the submarine

So here it is! I've taken a soda bottle and cut two rectangular sections out of it (to let BALLAST water in). Be careful cutting the bottle. I used scissors.

The Submarine Project

Hi Teams! Have you started construction yet? Remember, your submarine needs to float, sink and re float. Bonus points will be given to teams who can get their subs to become neutrally buoyant (hover). Also, don't forget your submarine needs to be designed in such a way that it provides a dry, safe space for your Lego sailor to be contained in. Good luck!

Pictures to follow.....

The Symbaloo has a new addition!

Hey Division 3! I've added the link to the TED talks video clip we've been looking at in Science. Please let me know if you experience any challenges viewing it.
